TECHNICAL PROJECTS

Personal Website, *HTML, CSS, JavaScript*

Fall 2023

Results

- Created a personal website to serve as a portfolio for future projects, as well as a place where users can learn more about who I am and what services/skills/values I possess as a software engineer.

Weather Website, *HTML, CSS, Async JavaScript, API implementation*

Fall 2023

Results

- Made a website which uses multiple APIs to present the weather information of thousands of cities globally. Users can search for data concerning the cloudiness, temperature, perceived temperature, wind activity, and humidity percentage.

Digital Clock, *Python-Tkinter*

Fall 2023

Results

- Created digital clock GUI that opens in a separate window and displays the time (military time).

WORK EXPERIENCE
